

**Seahawk Weather Station  
Updated System  
Connection Instructions  
for**

**ANDROID**

These instructions apply only to members who have previously connected to the weather station and have already downloaded the AcuRite app. If you have not downloaded the app, please see the original Seahawks AcuRite ANDROID Instructions.

1. Open the AcuRite app.
2. When the connection is finished, you will see the normal "No Devices" screen. Click on the 3 bar menu symbol.
3. Click on "Share Weather".
4. Click on "Follow Account" at the bottom of the screen.
5. Click on "Display Name" or "Nickname".
6. Enter "Seahawks" as the name.
7. Click on the first blank on the Device ID line.
8. Fill in the three blanks with "0A" "7D" "A0" (zero, not letter o)
9. Click on "Follow" or "Save" at the bottom of the screen.
10. Click on the 3 bar menu
11. Click on the Dashboard line or symbol.
12. Click on "Seahawks" at the top right of the screen.

You are DONE !!!

From now on when you open the AcuRite app, you will see the "No Devices" screen and you will see "Seahawks" in the top right of the screen. Just click on "Seahawks" and you are in.

All ANDROID phones are a little different. Hopefully you can use the steps above to figure out how your phone is set up. If you need help, please see Mike Massa at the field or call Mike at 303-880-4343.
