

**Seahawk Weather Station
Updated System
Connection Instructions
for**

Apple iPhone

These instructions apply only to members who have previously connected to the weather station and have already downloaded the AcuRite app. If you have not downloaded the app, please see the original Seahawks AcuRite Apple Instructions.

1. Open the AcuRite app.
2. When the connection is finished, you will see the normal "No Devices" screen. Click on "Settings".
3. Click on "Share Weather".
4. Click on "Follow" at the bottom of the screen.
5. Click on "Display Name".
6. Enter "Seahawks" as the display name.
7. Click on the first blank on the Device ID line.
8. Fill in the three blanks with "0A" "7D" "A0" (zero, not letter o)
9. Click on "Follow" at the bottom of the screen.
11. Click on the Dashboard symbol at the bottom left of the screen.
12. Click on "Seahawks" at the top right of the screen.

You are DONE !!!

From now on when you open the AcuRite app, you will see the "No Devices" screen and you will see "Seahawks" in the top right of the screen. Just click on "Seahawks" and you are in.

If you need additional help, see Mike Massa at the field or call Mike at 303-880-4343.
