Seahawk Field Cam App
Installation Instruction

Download the app called "ICView", also called ICRealtime. It's free.

Open the app after it is installed.

On the live preview screen, click on the camera icon in the top right of the screen.

Click on the '+" sign at the top right of the screen.

Click on the top line labeled "P2P"

Click on "P2P" again, the cursor will move to the Name: line.

In the Name: line, type "Seahawk Cams".

Click on the "SN:" line.

Type "AVR4M2081701E47C00040" in the SN: line.

Click on the "Username:" line.

Type "seahawk1" in the user name line.

Click on the "Password:" line.

Type "seahawk1" in the Password line.

Click in the Live Preview: line. Click on "Extra"

In the next screen, click on "Main"

Leave the "Playback:" line as is. It should say Extra

Click on "Start Live Preview".

When the next screen appears, there are some first time help images. Just swipe through them until the seahawk cameras appear for the first time.

Using the Seahawks Camera App

The next time you open the app, it will open on the "Live Preview" screen.

Click on camera icon at the top right of the screen

Click on the "Seahawk Cams" line making a check mark in the circle.

Click on "Start Live Preview" at the bottom of the screen.

Swipe the screen until the camera images appear. We have 3 cameras.

There are other modifications you can make to this app. For Example you can set up a camera group that only shows one camera at a time. You can set up a camera group that only displays the seahawk cameras. You can also double click on the images to make them full screen. You can rotate the images and you can zoom in with your fingers like you do on other images. Just play around with the app and its features or ask for help at the field. Rich Bressman, (father of the cameras), and Mike Massa have been known to help members with this new club equipment. Enjoy!
